Profile

Software engineering graduate (HND, 2026) and self-taught full-stack developer who builds and ships his own products for the Cameroonian market. I design around local realities: bilingual French/English interfaces, the Cameroonian education system, and pricing that fits local payment habits. Core stack: JavaScript, React, Node.js, Express, and MongoDB, with experience in mobile apps, secure authentication, and AI API integration.

Technical Skills

Core stack	JavaScript, React, Node.js, Express, MongoDB
Also used in projects	React Native, Expo, Firebase, i18next (EN/FR localization), JWT authentication, CSRF protection, Jest, Vite, PWA, AI API integration

Projects

CVBoost – AI CV Tailoring & ATS Scoring Tool cvbuilder-obfc.onrender.com
Founder & Developer

- Built and launched an AI-powered web app that tailors CVs to job descriptions and scores them for ATS compatibility, aimed at Cameroonian job seekers.
- Designed a pay-per-document and subscription model suited to the local market.
- Created the brand identity (logo, palette) and a go-to-market plan covering social content, partnerships, and metrics tracking.

Nexora Academy – Bilingual Edtech Platform nexoraacademy-cm.com
Founder & Developer

- Built a French/English learning platform for primary school pupils, delivered as a PWA with a companion React Native/Expo mobile app (Expo SDK 54).
- Migrated authentication from native Firebase modules to the Firebase JS SDK, combining backend-issued JWT sessions with secure on-device storage to stabilize builds.
- Implemented cross-platform localization with i18next and wrote an implementation guide for web and mobile reuse.

WardWatch (formerly CommunityPulse) – Civic-Tech Platform wardwatch-taap.onrender.com
Developer

- Developed a civic-tech platform with a Node.js/Express backend, React frontend, and MongoDB.
- Implemented and debugged cookie-based JWT authentication with CSRF double-submit protection.
- Repaired data migration scripts using ObjectId-to-region-code lookups, configured map features with maplibre-gl, and fixed Vite configuration issues.
- Established a Jest test suite (32 of 33 tests passing at last review).

ASEC SMS – School Management System hsc-sms-api.onrender.com
Developer

- Specified and built the grading module for Anglophone Cameroonian schools: six sequences, term and annual averages, subject coefficients, primary vs. secondary rules, and GCE O-Level / A-Level / Common Entrance distinctions.

Experience

Independent Developer – Self-Directed Projects Ongoing
Yaoundé, Cameroon

- Self-taught developer designing, building, deploying, and marketing a portfolio of products for Cameroonian users across web, PWA, and mobile.
- Own the full lifecycle: architecture, backend, frontend, deployment, branding, and growth planning.

Education & Languages

Higher National Diploma (HND), Software Engineering 2026
Kelden University Institute

Languages: English
